PROJECTS

Django Projects #1(Self learning)

E-commerce web-sit

Description

Project: E-Cart (E-commerce Website)

Developed a fully-functional e-commerce website, E-Cart, to showcase expertise in Django, HTML, CSS, Bootstrap, and SQLite. Implemented user-friendly frontend design with HTML, CSS, and Bootstrap for responsive layout. Utilized Django for robust backend functionalities including

user authentication, product management, order processing, and payment integration. Employed SQLite for efficient data storage and retrieval, ensuring quick loading times. Prioritized security measures to safeguard user information. E-Cart serves as a showcase project demonstrating proficiency in full-stack web development and the ability to create intuitive and secure online platforms

Fronddend Project #2

Description

Developed a dynamic multi-portfolio website showcasing proficiency in HTML5, CSS, Bootstrap, and React. Designed and implemented a sleek and responsive frontend using HTML5 and CSS, ensuring optimal user experience across devices. Leveraged Bootstrap for rapid development and seamless integration of components. Integrated React for interactive elements, including calculator modals, enhancing user engagement and functionality. This project serves as a testament to versatile skills in frontend web development and demonstrates the ability to create visually appealing and feature-rich websites using modern web technologies.
